

INDUSTRIAL HUMANOID LEASING PROGRAM

Persona AI is building the next generation of humanoid robots for industry. Our vision is to become the labor platform for skilled industrial work. Whether the site is a shipyard, an energy facility, a construction project, or another complex environment.

Our Persona humanoid robots are being built to take on the heavy industry 4D jobs – dull, dirty, dangerous, and declining – **so that humans don't have to.**

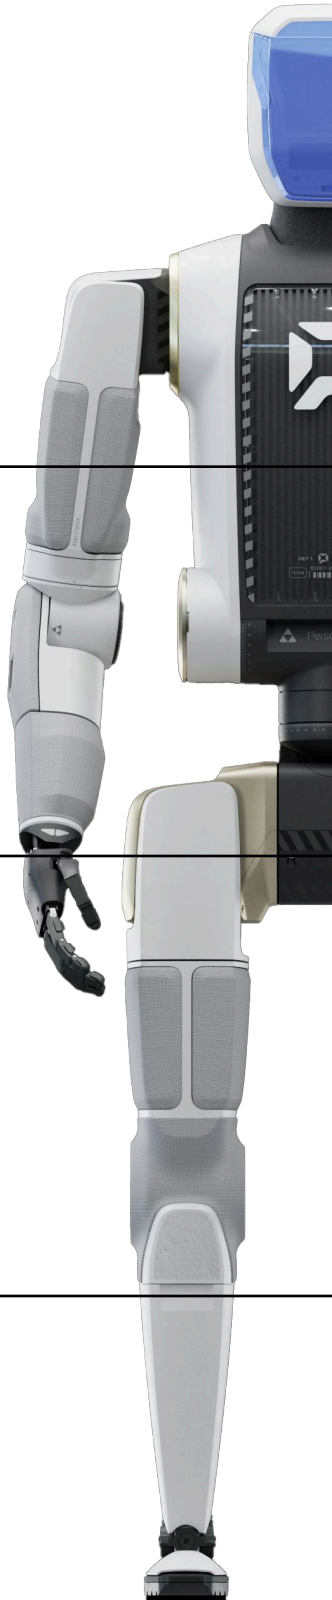

Use Cases

WELDER
FABRICATOR
BUILDER
ASSEMBLER
MINER

HUMANOIDS AT WORK™

A customer program to deploy autonomous humanoid robots across shipyards, fabrication shops, construction sites, and other industrial facilities without large capital expenditure investment. Persona humanoids are AI-enabled, and will be capable of performing complex, physical tasks independently and operate continuously with minimal supervision. Pre-orders now available targeting a Q3-2027 deployment. Constructor program members may receive development units earlier.

Applications

Welding and metal fabrication

Shipyard and outfitting tasks

Material handling and logistical operations

Flexible Lease Terms

1 Yr

Pilot
Evaluate humanoids in real production environments

2-3 Yrs

Operational Deployment
Integrate robots into production workflows

4-5 Yrs

Strategic Deployment
Establish a scalable robotic workforce

Lease Package Includes

AI-enabled humanoid platform
Autonomous perception and task execution API
Industrial tooling modules for welding and fabric maintenance
Over-the-cloud software updates and performance improvements
Training programs for employees managing robot fleets
